I came across this video on youtube showing the new Honda 700XX. I must say I am impressed by some of the features, but only time will tell if this quad is the overall favorite for riders. I personally don't care for the plastic on this bike, but I would have to save the IRS is pretty cool. A few major things I noticed was the weight on this bike, its 100 pounds heavier than the Raptor. This bike should be in stores by now, they gave a date of April 2008. Check out the video for more information. [youtube:<http://www.youtube.com/watch?v=PCKHOgyx6ts&feature=related> 500 500]
